Progress Report Template

Name: Ophilia
Student ID: 300386351

Worklog

Date	Hours	What was done
9-Sep-26	2.5	Brainstormed project ideas during the first lecture, discussed them with the professor, and received approval to proceed with the project.
16-Sep-26	0.5	Spoke with an engineering manager about becoming my industry partner. However, their area of expertise is different from the focus of my project.
18-Sep-26	1	Met with Kalachinskaya, Olga, Faculty Subject Librarian for ENGR, MATH, CSIS, CMPT, VTEC, and VOAC, to discuss how to find research papers to support my Applied Research Project.
18-Sep-26	0.25	Created GitHub repo (F26_4495_S2_OphiliaF); added professor kandhadaip@douglascollege.ca as collaborator
20-Sep-26	3	Found three research papers that can be used to support my project.
23-Sep-26	1	In-person check-in with professor; confirmed project topic and scope
25-Sep-26	4	Wrote and edited the project proposal, consolidated the content, and simplified the wording to make the proposal clearer and easier to understand.
26-Sep-26	0.25	Meeting with Professor
28-Sep-26	1	Finalizing the proposal and submitting it
30-Sep-26	2	Spend some time on the DataCamp website to revise the concept of EDA
7-Oct-26	0.5	Wrote a few lines of HTML code
8-Oct-26	1	Revised Git commands and organized the GitHub repo
11-Oct-26	2	Found the dataset. IEEE dataset was a paid one; hence, I moved to Kaggle and found the dataset.

What went well: The primary focus of these two weeks was to find the right dataset. I spent time in the IEEE dataset to find the right dataset to proceed with. Then, whenever I found a dataset that I would like to work with, I had to pay around $50 just to download the dataset, which I thought was not necessary, and I moved to Kaggle to find datasets. In future, maybe I can learn about web scraping and try getting more real and live data. I also revised some git commands, revised a few EDA codes and revised HTML codes as well to get started.

Progress Report Template

What did not go according to the plan: I had a dental surgery scheduled, and I was in a lot of pain throughout these three weeks; hence, I couldn't complete a lot of work as I anticipated.

Repo Check-in of Implementation completed: I have added a FrontEnd folder and RawDate folder to keep the HTML files and the Excel sheets.

AI Use Section:

-

AI Tool Name	**Version, Account Type**	**Specific feature for which the AI tool was used**	**Value Addition** ***What value did you add over and above what AI did for you? In your own words***
Claude	Claude Pro	How to find free and quality data	It recommended using the college email to log in to IEEE to access the datasets for free, but it didn't work. So used Kaggle instead
